UNION ELECTRIC COMPANY

1901 Gratiot Street, St. Louis January 29, 1986

Mr. David E. Bedan, Ph.D.
Missouri Department of Natural
Resources
Waste Management Program
P.O. Box 176
Jefferson City, MO 65102

PROGRAM

Dear Dr. Bedan:

EPA recently promulgated rules dated November 29, 1985, (50FR49164) which require facilities handling or burning waste oil fuels for energy recovery to notify appropriate regulatory agencies of their burning activities. As you know Union Electric does burn waste oil for energy recovery. Therefore, since you have been identified as the appropriate regulatory agency, please find attached notification forms (8700-12) for our Ashley Plant burners

Redacted to remove non-responsive

We believe our current operations fall within the EPA definition information. of a "used oil burner". However, there are still portions of these rules which have not yet been finalized. As well, we are re-evaluating our operations to determine if we should permit these facilities as "hazardous waste fuel burners". Therefore, in order to retain our options under this rule, we are also filing as hazardous waste fuel burners and marketers.

We plan to complete our evaluation prior to the May 29, 1986, deadline for filing part A permit applications under RCRA and appropriate state regulations. We will notify you on or prior to that date of the results of our evaluation.

If you have any questions, please feel free to contact me or John Pozzo of my staff at (314)554-2280.

Sincerely,

Thomas E. Siedhoff

Manager

Environmental Services
